## Retail Price List

### on Perennial Seedlings and Peonies

Attached is a list of our perennial seedlings which we have to offer this coming fall and next spring. These are now ready for shipment. We have exercised a great deal of care in making this selection and have secured our seed from what we consider the most reliable source in the country to get true varieties.

We have developed a system of packing that we think is second to none and we can assure you these plants will arrive at your place in good condition. We have done considerable research work on this and have asked for reports when we have made shipments to Massachusetts, Maine, Oregon, Washington and other distant states. Invariably the reply has come back that the plants arrived in good condition. One party from Oregon wrote us that they were in better condition than plants that they had received from the next county. You need have no hesitancy on ordering on account of the distance.

Last year we had an exceptionally large business and were out of plants and obliged to return many hundreds of dollars because we were sold out on some varieties. This year we anticipated a still larger business and have made our plantings accordingly. If you could get your order in early you will have it filled in full. Give us a try and you will not be disappointed.

Not sold in less than dozen lots.

No orders filled for less than one dollar.

Very truly yours,

RICHARDS GARDENS

	Per Doz.
Achillea Perry's White (Yarrow) .....	.35
The best White, 1 to 2 ft., June to Sept. Nothing better for cutting	
Alyssum Saxatile Compactum (Gold Dust) ....	.35

Pale blue. 2 inches high	
<b>Viola Cornuta Apricot (Tufted Pansies)</b> .....	.50
Popular garden flower, continuous and free bloomer	

# Peonies

## RETAIL TRADE LIST

We are again presenting you with our list of peonies that will be ready for delivery this fall. The hot dry weather has raised havoc with many peonies but ours came through in fine shape as we were able to water them when needed. Many varieties are scarce and hard to find in the true variety but we have not increased our prices only in one or two instances and in some instances have lowered them. Our grade will be the same as always three to five eye natural divisions from two and three year old stock. Clean and free from disease and guaranteed true.

Peonies will do well on any good soil that will grow good corn. They should be planted for bloom not closer than three feet apart. The eyes should not be planted more than two inches under the surface as when planted deeper in many cases they fail to bloom.

Rating	Each
8.5 Adolphe Rousseau, red .....	.60
8.6 Albert Crousse, pink .....	.40
8.4 Asa Gray, pink .....	.40
9.7 Auguste Dessert, dark pink .....	.50
